Communications  
Council

Data embedded in every decision, interaction and process

Data is processed and delivered in real time

Flexible data stores enable integrated, ready-to-use data

The CDO's role is expanded to generate value

Data-ecosystem memberships are the norm

Data Management is prioritized and automated

# Data-driven enterprise of 2025

McKinsey  
& Company

1. There is no typical CDO role
2. CDOs typically have very broad set of internal stakeholders
3. Most CDOs do not report to board member
4. Lack of data literacy remains a barrier for culture change
5. CDOs role shift towards more strategic and less operational
6. Over 80% CDOs do not identify as technologists

## 1<sup>st</sup> Chief Data Officer Report

**Deloitte.**

# CDOs' roles distribution

7. CDOs looking to develop their business case for funding data transformation
8. CDOs are growing their teams but face challenges in a highly competitive market for skills
9. CDOs are focusing on developing skills in house

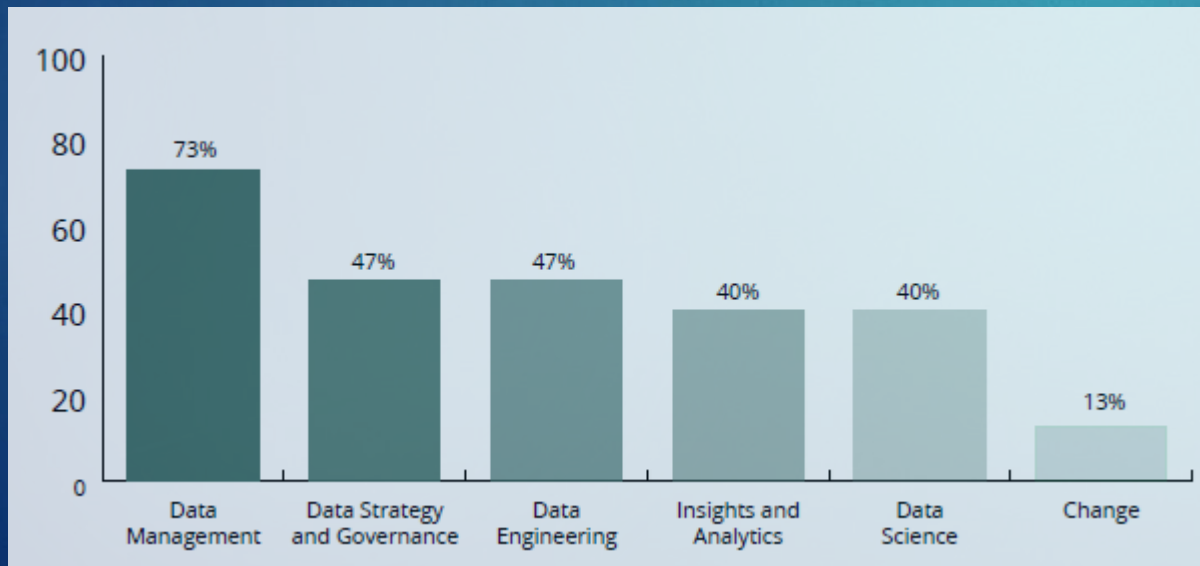

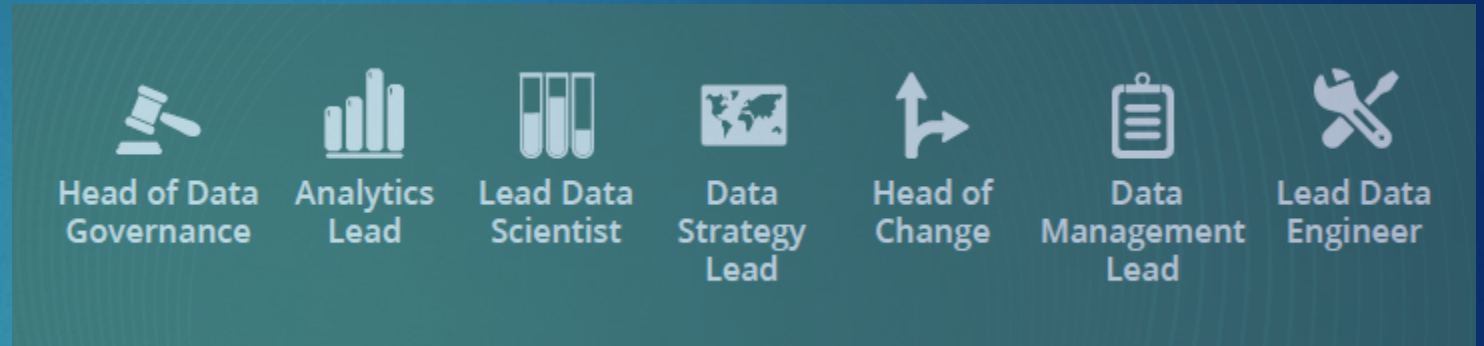

1<sup>st</sup> Chief Data Officer  
Report cont.

**Deloitte.**

# Roles which typically report to CDO

% of CDOs who have a dedicated team or resources in each area

# CDOs' future role transformation

## Now

CDOs reported that they see their current role split across all four faces, but with the strongest focus on Operator: delivering data services to support the business.

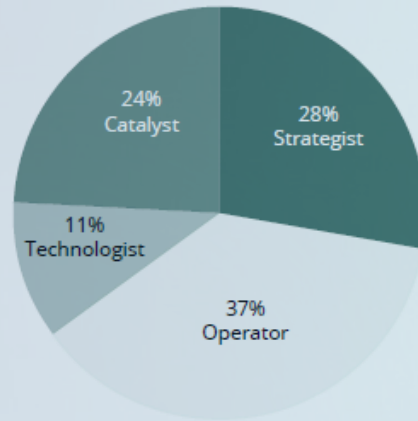

Figure 5: Four faces: current role

### Technologist

53% of participants did not allocate time to the technologist role at all. No CDOs identified 'Technologist' as being their main focus.

### Operator

Participants flagged that they currently spend the majority of their time as an operator, with over half of participants highlighting it as their dominant or jointly dominant role.

## Future

CDOs reported to us that they would like to focus most of their effort on Strategist: leading data activities across their organisation.

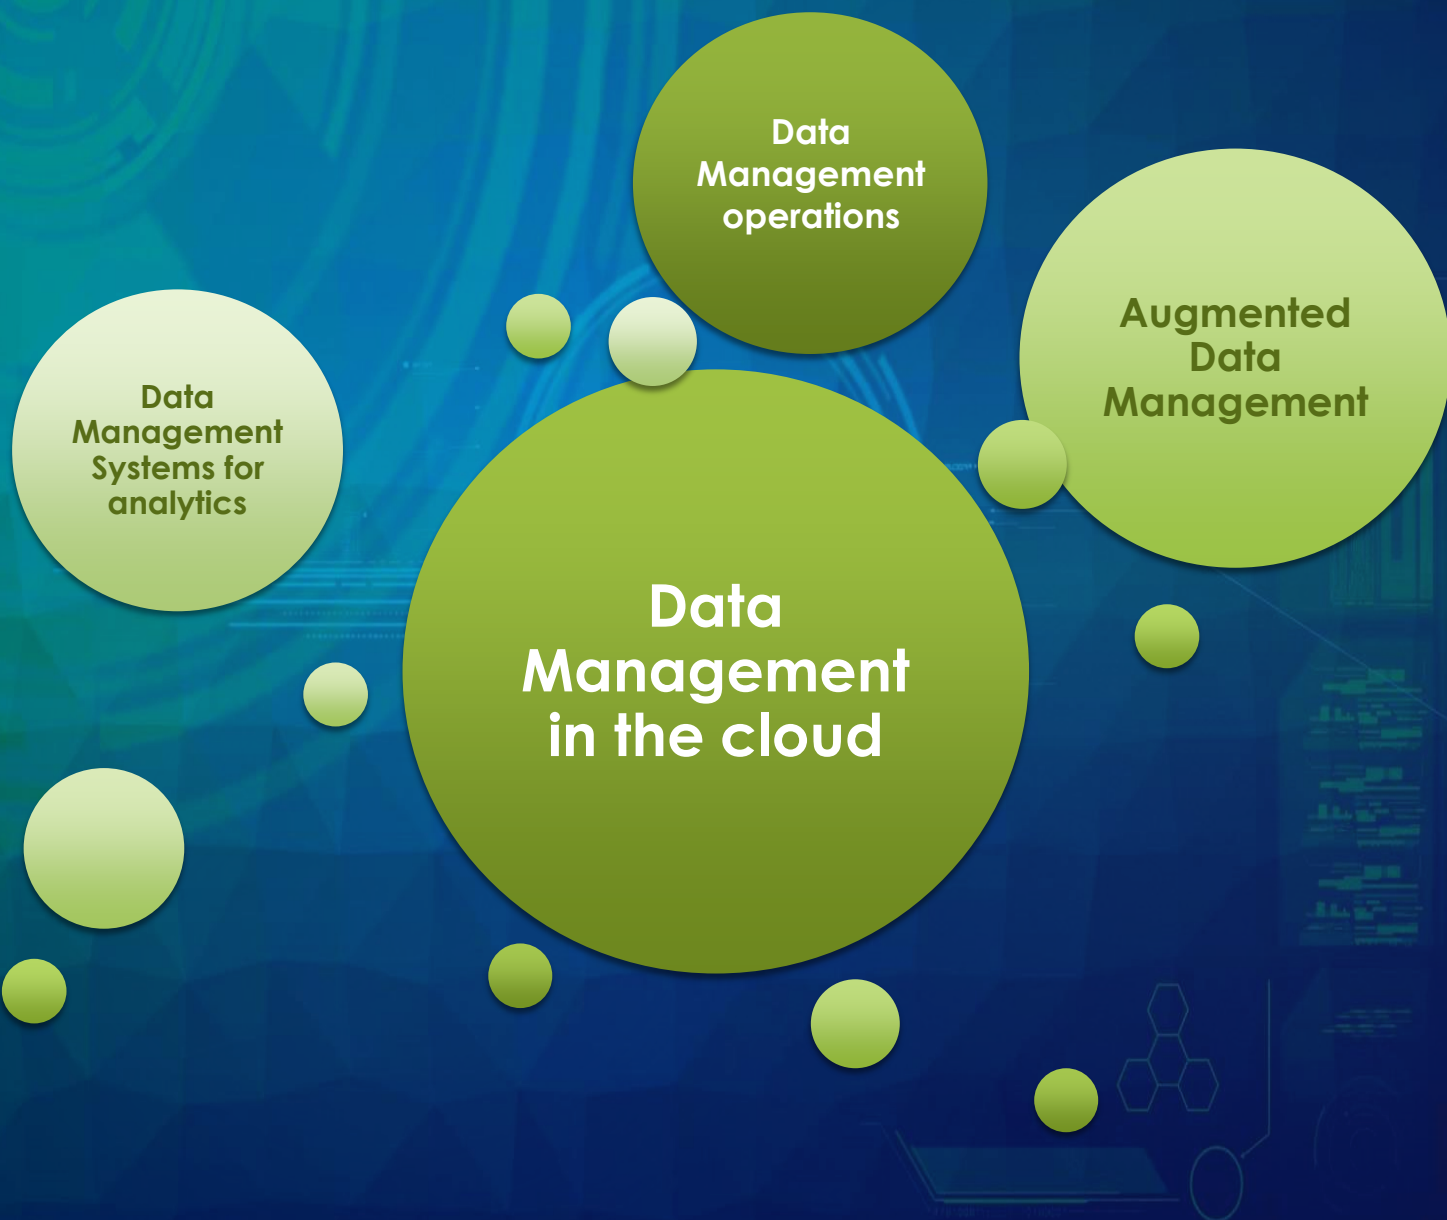

Figure 6: Four faces: future role

### Catalyst

73% of participants want to continue to dedicate the same amount of time or more time to their role as a catalyst.

### Strategist

60% of participants indicated they want to increase their time focused on setting direction and strategy, on average increasing the amount of time they dedicate to this by nearly double.
